```java
public class Test {
    public Test () {

    }

    public static int cal (int a , int b) {
        return (a * b - 2) / 3 ;
    }

    public static main ( String [] args) {
        int a = 13;
        System. out. println ( cal (2, a));
    }
}
```
